

## SolarInvert Energy Solutions

# Irish Photovoltaic New Energy Storage Equipment

## Overview

---

What is energy storage Ireland?

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland. Delivering the energy storage technologies to enable a secure, carbon free electricity system on the island of Ireland by 2035.

Will Ireland need more energy storage?

With a target of 80% renewable electricity from intermittent sources on our grid by 2030, Ireland will require a significant amount of energy storage in the years to come.

What is Ireland's energy storage policy?

This is the first electricity storage policy published in Ireland. The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030.

Which energy solutions are best for the Irish power system?

FuturEnergy Ireland has assessed a range of these solutions in the context of the Irish power system. To date we have identified Form Energy's Iron-Air technology as the one with the greatest potential to cost-effectively tackle these problems in the Irish market. Form's iron-air system is:.

How will long-term storage technology impact Ireland's power system decarbonisation?

New and emerging long duration storage technologies will play a critical role in delivering an affordable, fully decarbonised power system to the people of Ireland. #1 We have a problem: The amount of wasted renewable energy in Ireland is projected to increase exponentially as we attempt to deliver on our

power system decarbonisation targets.

Can energy storage be deployed in Ireland?

Appropriate and timely regulatory and market design is therefore essential to allow the deployment of energy storage in Ireland at the scale required to achieve current environmental policy objectives. However, the current policy framework is unsuitable to deliver the volumes and types of energy storage we will require.
