Is North Macedonia's outdoor power supply waterproof and how much does it cost

Overview

How does North Macedonia generate electricity?

North Macedonia has historically relied on hydropower for a significant portion of its electricity generation. The country has utilized its rivers to develop hydropower plants. There have been also efforts to harness wind energy, and several wind projects have been proposed or are under development.

What if North Macedonia used its technical potential?

As we can see, if North Macedonia would use its entire technical potential, it would increase the generating power by 321%. North Macedonia has calculated a potential emission reduction of 30% by 2030. Greenhouse gas emissions in N. Macedonia are in 2016 around 11Mtons of CO₂ and in energy sector 7,66Mtons of CO₂ equivalent.

What is the main source of energy in North-Macedonia?

In the year 2022, the primary source of energy in North-Macedonia, as reflected in the country's total energy supply, was oil, accounting for 45% of the total. This was followed by coal, which constituted 32% of the total energy supply. Coal accounted for 47% of electricity generation, followed by hydropower with 23% and natural gas (17%).

Is biomass a source of electricity in Macedonia?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. North Macedonia: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

Who regulates the energy sector in North Macedonia?

Energy Regulatory Commission (ERC): The Energy Regulatory Commission

regulates and oversees the energy sector in North Macedonia. ERC is responsible for ensuring fair competition, consumer protection, and adherence to legal and regulatory standards. 3.

What are the challenges facing North Macedonia?

Greenhouse gas emissions in N. Macedonia are in 2016 around 11Mtons of CO₂ and in energy sector 7,66Mtons of CO₂ equivalent. While North Macedonia has significant renewable energy potential, there are challenges associated with increasing the share of renewable energy in the country's energy mix. Some of the challenges include:
