

SolarInvert Energy Solutions

Is outdoor power supply really useful for camping

Overview

What power source do you use when camping?

The Rockpals 250W portable generator is our personal power source when we go camping. The ability to charge our laptops at the campsite in a small, lightweight package is ideal. We pair it with Rockpals 100W solar charger and as long as the sun is out, we can stay productive for hours! There are some power limitations, though.

Should you buy a solar powered camper if you're off-grid?

Since they don't need to be recharged using electricity, these are a good option for campers who want to stay off-grid for a while, particularly if you're camping in a forest or other area where solar power may not be a reliable solution. Of course, you ideally need some fast-flowing water nearby to power the device.

How much power does a camping tent need?

With 400 W of AC power and 12 V DC power, you will be able to keep your tent lit up at night, charge your family's electronic devices, and if you accidentally leave your car lights on, you're not going to get stranded. The air compressor feature is one you don't typically find on other portable power supplies.

Should you use a power inverter on a camping trip?

A power inverter can be used to charge devices using your car or van battery. If you're staying at a campsite and driving every day, this can be a good way to keep your smartphone and laptop charged. The main issue with charging things off your vehicle is that you could drain the battery and end up on a longer camping trip than you'd anticipated.

Should I use a power station or a USB charger?

USB chargers are a great option for weekend camping trips and emergency use, but if you're going off-grid for a more extended period or you want to

charge larger items, a power station may suit you better. The Rockpals 250W portable generator is our personal power source when we go camping.

Can I charge my laptop at the campsite?

The ability to charge our laptops at the campsite in a small, lightweight package is ideal. We pair it with Rockpals 100W solar charger and as long as the sun is out, we can stay productive for hours! There are some power limitations, though. It takes a while to fully charge one laptop computer, which will drain most of the generator's power.
