**Is there any energy storage
power station in Valletta put
into operation**

Overview

Is there a market for electricity storage in Italy?

The market for electricity storage in Italy is growing very fast. However, the legislative framework is fragmented and does not fully cover all the main features of this market. Until a few years ago, the legislation only mentioned pumped hydro and did not acknowledge any other forms of energy storage.

Can batteries be used for energy storage in Italy?

In Italy, batteries have become an attractive technology for electricity storage projects although they are not traditionally used.

Who owns pumped hydro storage facilities in Italy?

Originally, pumped hydro storage projects in Italy were developed by the then state-owned electricity companies. However, after the electricity market was liberalised, most of these projects are now owned by commercial companies, with Enel being the main operator in the field. Enel, which is partially owned by the Italian government with 25.5% of the company's shares, is the main operator in the field of pumped hydro storage.
