

SolarInvert Energy Solutions

Japan Osaka Energy Storage Temperature Control System Manufacturer

Overview

What is Itochu & Osaka Gas?

With this business, ITOCHU will design and supply energy storage system and power conditioners from its own procurement network, and will also build and maintain an optimal storage system. Osaka Gas will oversee trading in the energy market and control of the storage plant by utilizing its knowledge of the energy trade.

Why is Itochu working with Osaka Gas & Tokyo century?

ITOCHU will work on this business together with Osaka Gas and Tokyo Century to ensure that the balancing power produced through this business can contribute to the further introduction and stable supply of renewable energy. Open area within the OSAKA GAS NETWORK CO., LTD. Senri Supply Center grounds.

How will Itochu contribute to the stabilization of Japanese electric systems?

By using the energy from these energy storage batteries in the wholesale electricity market, the balancing market, and the capacity market, ITOCHU will contribute towards the stabilization of Japanese electric systems. Installation will begin in the first half of FY2023 and operations are expected to begin in FY2025.

Why should you choose Osakan Reiken products?

Products | OSAKA REIKEN CO.,LTD. we envision the standards of the next generation. promoting long service life and easy maintenance. Using products longer ultimately contributes to global ecology. As professionals, we propose optimum solutions. OSAKA REIKEN proposes excellent temperature control and drying technique.

How Osaka Reiken can improve the quality of pet products?

OSAKA REIKEN proposes excellent temperature control and drying technique.

Long term stable PET product manufacturing is achieved by high control precision, stability and low power consumption. Temperature control of the mould with high accuracy for various molding machine used by manufacturing and the most suitable condition is always kept.
