Juba Battery Energy Storage System

Overview

A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to provide electricity to thousands of homes. Why should South Sudan invest in solar power & battery storage?

This project marks a significant achievement for South Sudan, reinforcing its commitment to renewable energy and environmental responsibility. By investing in solar power and battery storage technology, the country is making a decisive move toward energy independence, economic growth, and a sustainable future for its people.

How will a 20 MW solar plant benefit Juba?

The 20 MW solar plant is set to power approximately 16,000 households in Juba. It will also enhance grid stability and reduce energy costs for consumers. The accompanying battery storage system ensures that solar-generated power remains available when needed, stabilizing the grid and improving renewable energy reliability.

What is a solar power plant in South Sudan?
