

SolarInvert Energy Solutions

Kosovo Solar Air Conditioning Recommendations

Overview

What is solar 4 Kosovo II?

The “Solar 4 Kosovo II” project is one of the largest energy projects in Kosovo. It will be one of the largest solar plants in Europe and the first in the region in terms of capacity, using clean solar energy for the benefit of heating.

Does Kosovo have solar power?

Kosovo has the potential of capturing solar energy directly and converting it to electricity. The region of highest solar potential based on global horizontal irradiation is the southwestern part of Kosovo, centred around the city of Gjakova. Solar power is already used on the roofs of some buildings.

How Termokos will be able to integrate solar energy and cogeneration?

By installing solar panels over an area of 69,000 square meters, two systems will be integrated: solar energy and cogeneration. This integration will enable an additional thermal capacity of 50 MW, supplying heat to 12,000 new consumers of POE “Termokos” J.S.C.
