Large cylindrical 10ah lithium battery

Overview

What is a 100Ah lithium-ion battery?

A 100Ah lithium-ion battery is a 12.8V, 100Ah battery, which is the premium option for various applications. It features a lighter weight, approximately 40% of the weight of a comparable lead acid battery.

What is a lithium titanate LTO battery?

2.4V 10Ah lithium titanate cylindrical LTO battery cell with 20C discharge rate and more than 20000times cyclelife. Individual pricing for large scale projects and wholesale demands is available. Lithium titanate battery is a kind of lithium-ion battery anode material - lithium titanate.

What is the operating voltage of lithium titanate battery?

The operating voltage of lithium titanate battery is 2.4V, the maximum voltage is 2.8V, and the charging current is greater than 2C (i.e. the current twice the capacity of the battery). Parameters 2.4V 10Ah lithium titanate cylindrical LTO battery cell with 20C discharge rate and more than 20000times cyclelife.

What is lithium titanate battery?

Lithium titanate battery is a kind of lithium-ion battery anode material - lithium titanate. It can be used to form 2.4V or 1.9V lithium-ion secondary battery with lithium manganate, ternary materials or lithium iron phosphate and other cathode materials.
