

## SolarInvert Energy Solutions

# Large lithium battery energy storage assembly plant

## Overview

---

This facility, spanning 50 mu (3.3 hectares), integrates lithium and sodium-ion battery technologies to enhance energy storage efficiency and support the integration of renewable energy sources into the power grid. Why did Eve build a super energy storage plant for Mr Big?

To solve the challenges that the size of large batteries poses to production lines and manufacturing processes, EVE Energy has specially built the 60GWh Super Energy Storage Plant for Mr. Big. The Plant employs over 80 advanced industry technologies, featuring automated production across the entire process.

How does Eve Energy support the mass production of Mr Big's battery cells?

To support the mass production of Mr. Big's large battery cells, EVE Energy is committed to building a world-class super energy storage plant. It has established a virtual factory leveraging digital twin technology, creating a super intelligent factory that integrates automation, digitization, and low-carbon processes.

Which cell and EV manufacturers are located in Asia?

These cell and EV manufacturers are CATL (36.7%), BYD (15.8%), LG Energy Solution (13.8%), Panasonic (6.8%), SK Innovation (5.1%), CALB (4.7%), Samsung SDI (4.6%), Gotion (2.4%), EVE (2.1%), SUNWOOR Energy (1.4%), and others (6.6%), which are primarily located in Asia.

What are the advantages of large-capacity battery cells?

The advantages of large-capacity battery cells lie in their ability to reduce the cost and integration complexity of energy storage systems, improve energy density and safety, and reduce the use of components in the PACK stage, thus simplifying the assembly process and further lowering costs.

Are Chinese battery companies expanding their manufacturing in Europe?

Another trend is for Chinese battery companies, such as CATL, to establish and expand their manufacturing in other continents, particularly Europe. 43 Manz AG, GROB-WERKE GmbH & Co. KG, and Dürr Group have entered a strategic partnership to jointly acquire and execute projects for outfitting complete battery manufacturing plants.

Which countries are accelerating efforts to localize lithium production?

For instance, while China leads in large-scale production, countries like India are accelerating efforts in local cell manufacturing, and South American nations like Chile, with their lithium reserves, are exploring partnerships to localize production and integrate renewable energy sources.
