Lead-acid battery cabinet shipping

Overview

For all methods of transport the U.S. legal requirements are laid down in the Code of Federal Regulations (CFR 173.159) which state: 1. Batteries should be individually wrapped so that there is no chance of.

How do I ship lead acid batteries?

UN specification packaging such as 4G fiberboard boxes, various types of drums, and wooden boxes are all compliant to ship lead acid batteries per the 49CFR. If you are shipping by air, a leakproof liner is also a requirement as well.

What is a lead acid battery?

Let's take a look at the various domestic and international regulations. For the purpose of this blog, we will be examining Lead Acid Batteries classified as UN2794 which are Batteries, wet, filled with acid. Per the 49CFR 173.159, lead acid batteries must be packaged in a manner to prevent a dangerous evolution of heat and short circuits.

How should lead acid batteries be packaged?

Per the 49CFR 173.159, lead acid batteries must be packaged in a manner to prevent a dangerous evolution of heat and short circuits. This would include, when practicable, packaging the battery in fully enclosed packaging made of non-conductive material, and ensuring terminals aren't exposed.

Can I ship lead acid batteries internationally?

Similarly, the IMDG code sets out similar requirements at Packing instruction P801 when you are shipping internationally by Sea. Using UN packaging would also be acceptable to ship lead acid batteries within Canada as well as by Sea internationally. If you are shipping internationally by air, we would look in IATA at Packing instruction 870.

How are lead acid batteries transported?

The transportation of lead acid batteries by road, sea and air is heavily

regulated in most countries. Lead acid is defined by United Nations numbers as either: The definition of 'non-spillable' is important. A battery that is sealed is not necessarily non-spillable.

What HS code is a lead-acid battery?

Lead-acid batteries fall in the UN class 8 (corrosive) and hold the HS code 8507.10 for lead-acid starter batteries. They are widely used in vehicles and backup power systems. Common lead-acid types are starter batteries, deep cycle batteries, and VRLA (valve-regulated lead acid) batteries.
