Lithium battery 12v cylindrical

Overview

What is a 12V lithium ion battery?

A 12V lithium ion battery, also known as a 12V lithium polymer battery, has a nominal voltage of 12V and is widely used in digital products, power tools, special wearable devices, etc. The price of a 12V lithium battery mainly comprises of the cell, PCM, and case.

What is a 12V Lithium polymer battery?

A 12V Lithium polymer battery is a type of battery. It has large current and capacity capabilities. Lithium polymer batteries capable of high power discharge need to control the current within the product specifications. If it's not urgent, it can be charged with 0.2C, and the current generally cannot exceed 1C.

What is a lithium-ion power brick battery?

The Lithium-Ion PowerBrick battery 12V-12Ah offers high level of safety through the use of cylindrical cells in Lithium Ferro Phosphate technology (LiFePO₄ or LFP). PowerBrick 12V-12Ah integrates an innovative Battery Management System (BMS) in its casing to ensure a very high level of safety in use.

What is a 12V battery - 154wh - powerbrick+?

12V Battery - 12Ah - 154Wh - PowerBrick+ offer a high level of safety with an embedded BMS and use of high quality Lithium cylindrical cell.

What is the nominal voltage of powerbrick lithium battery?

The PowerBrick Lithium battery 12V-12Ah has a nominal voltage of 12.8V. It can be easily assembled in series (up to 4 PowerBrick 12V in series, or 2 PowerBrick 24V in series) and in parallel (up to 16 PowerBrick in parallel). The battery is protected by a waterproof ABS case, splash and dust resistant (Protection index IP65).

How does powerbrick 12v-12ah work?

PowerBrick 12V-12Ah integrates an innovative Battery Management System (BMS) in its casing to ensure a very high level of safety in use. The BMS constantly monitors and balances the battery cells to protect the battery and increase its life.
