# **Lithium battery energy storage system shipping**

## Overview

---

Are LIBs able to be applied to shipboard energy storage batteries?

The high degree of electrification of ships has always been a development trend. The huge difference between the shipping environment and the land environment has resulted in the research on LIBs on land being unable to be fully applied to shipboard energy storage batteries.

How to ship lithium batteries from China?

Express Shipping (DHL, FedEx, UPS, SF Express) is suitable for small shipments, prototypes, or urgent samples but has weight restrictions and additional fees for hazardous materials. Steps for Shipping Lithium Batteries from China.

Why is lithium-ion battery used in ship ESS?

Because lithium-ion battery (LIB) has excellent energy performance and is not prone to self-discharge, it has been increasingly used in ship ESSs. For example, in 2022, the “Pulong” cable guard ship designed and built by Hunan Xiangchuan Shipbuilding Industry Co., Ltd. has been put into use.

What are the classification and shipping requirements for lithium-ion batteries?

The classification and shipping requirements for lithium-ion batteries depend on their size and energy capacity (Watt-hours). For standalone batteries. Strict UN-certified packaging. IUMI strongly supports the SoC limit of 30% for air freight and advocates similar principles for maritime transport.

Which shipping method is best for lithium batteries?

If shipping large quantities (e.g., EV batteries, industrial battery packs), sea freight is the most economical choice. However, for time-sensitive orders, air freight or express shipping is recommended. Packaging and Labeling Requirements for Lithium Batteries.

Can a lithium battery be shipped by sea freight?

Only lithium batteries that comply with IATA (International Air Transport Association) standards can be transported. Sea Freight is ideal for bulk shipments of EV batteries, industrial battery packs, and large orders. However, shipping times are longer, and proper dangerous goods documentation is required.
