Outdoor All-in-one ESS cabinet

## Overview

---

How many batteries did CATL ship in Q3 2024?

In Q3 2024, CATL shipped over 120 GWh of batteries, a quarter-on-quarter increase of about 15%, with less than one-fourth of this being energy storage batteries and three-fourths being EV batteries.

What is CATL's EV battery market share?

Domestically, CATL's EV battery market share reached 45.9% in the first nine months of 2024, a year-on-year increase of 3.1 percentage points, maintaining its top rank. On the energy storage side, CATL saw a substantial increase in overseas shipments.

How has CATL performed in Q3 2024?

Despite this, CATL has maintained quarterly net profits above RMB 10 billion due to continued improvements in its gross profit margin. In Q3 2024, CATL's gross profit margin reached 31.17%, the highest since Q4 2018.

Why did CATL's profit margin increase in Q3 2024?

In Q3 2024, CATL's gross profit margin reached 31.17%, the highest since Q4 2018. At CATL's Q3 earnings briefing, CFO Zeng Shu explained that the gross margin increase was driven by further declines in the prices of key materials, such as lithium carbonate, alongside reduced sales prices.

Which battery brands are coming out in 2022 & 2023?

These battery brands were launched in 2022 and 2023, respectively. This year, CATL has introduced multiple new products, including the Shenxing Plus Battery, the next-generation high-power Kirin Battery, and the Tianheng Energy Storage System.

What EV batteries will CATL sell next year?

These two products are expected to account for 30% to 40% of CATL's EV battery shipments this year and could rise to 70% to 80% next year. The Kirin Battery is targeted at the high-end passenger car market, while the Shenxing Battery focuses on the value-for-money passenger car segment.
