# Lithium battery power station in Mexico

## Overview

---

Spanish company Endurance Motive will open Mexico's first lithium battery factory in Puebla, as Mexico continues to capitalize on the booming electric vehicle industry. Can lithium batteries be used for electric vehicles in Mexico?

As one of the most crucial automobile manufacturing countries, Mexico has recognized the potential of lithium batteries to advance the field of electric vehicles. The present work aims to provide an overview of lithium batteries in Mexico for electric vehicles and highlights the research topics and the current state of the art.

Can a lithium-ion battery make a profit in Mexico?

AMLO and many Mexican policymakers hope to leverage lithium to profit from the rapidly growing value chain of clean energy minerals and technology. Lithium-ion batteries, electric vehicles, and other clean energy technologies are attracting skyrocketing sums of capital.

Will Mexico create an electric battery industrial park?

Mexico City — The Mexican government is planning to create an electric battery industrial park where Tesla and other lithium battery manufacturers could set up shop, targeting the center of the country as the location, Martha Delgado, undersecretary for multilateral affairs and Human Rights at the Foreign Ministry, told Bloomberg Línea.

Is Mexico a good place to buy lithium?

Mexico's so far undeveloped lithium industry has huge potential, with the country's reserves estimated at 1.7 million tons of lithium. Several private companies want to start developing projects in Mexico as the demand for lithium for batteries is rising rapidly, as well as in support of a green transition.

Does Mexico offer subsidies to lithium battery manufacturers?

She said that the US currently offers subsidies to lithium battery manufacturers, while the Mexican government has said that there will not be direct subsidies to such companies, and that the finance ministry is working on a package of “interesting” incentives for Tesla to set up shop in Mexico.

Will Mexico start producing lithium batteries in 2023?

( Image courtesy of Bacanora Minerals | Twitter. Mexico, which nationalized lithium resources in April, plans to start producing lithium batteries in late 2023 as it has secured foreign investment and the backing of the United States, its leading trading partner.
