

## SolarInvert Energy Solutions

# Lithium-ion energy storage battery shipments

## Overview

---

According to InfoLink's global lithium-ion battery supply chain database, energy storage cell shipments reached 202.3 GWh in the first three quarters of 2024, up 42.8% YoY. Are lithium-ion batteries suitable for stationary energy storage?

Lithium-ion batteries (LIBs) are popular energy storage systems due to their high energy density. However, the uneven distribution of lithium resources and increasing manufacturing costs restrain the development of LIBs for a large-scale stationary energy storage application , , .

What are energy storage lithium battery packs?

Energy storage lithium battery packs are based on lithium iron phosphate batteries. They are a lithium battery system designed in series with modules, featuring a reliable BMS system and high-performance equalization technology to improve overall safety and service life.

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

How did global lithium-ion batteries grow in 2024?

Global total shipments of lithium-ion batteries increased by 29pc from a year earlier to 1,545GWh in 2024, including 1,215GWh in China that rose by 37pc on the year and accounting for 79pc of the total. Continued demand growth in China and the country's elevated investment in overseas production boosted global shipments.

What is InfoLink's global lithium-ion battery supply chain database?

InfoLink Consulting has launched its global lithium-ion battery supply chain

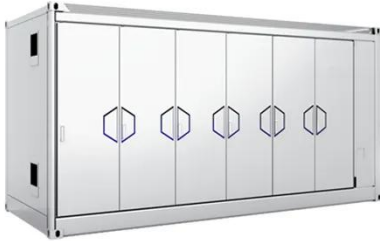

database. According to InfoLink's global lithium-ion battery supply chain database, energy storage cell shipments reached 202.3 GWh in the first three quarters of 2024, up 42.8% YoY.

Which energy storage cell manufacturers have the most shipments in 2024?

In the first three quarters of 2024, global utility-scale energy storage cell shipments reached 180 GWh, up 49.4% YoY. The top five manufacturers, CATL, EVE Energy, Hithium, CALB, and BYD, dominate the market, with the top two holding nearly 55% combined share. Hithium, CALB, and BYD each shipped over 10 GWh with similar volumes.
