Lithium power station factory in Ethiopia

Overview

Will Ethiopia become Africa's first lithium exporter?

Ethiopia is set to join the ranks of Africa's lithium exporters, with first production from the Kenticha resource slated for later this year. But doubts about this claim have been raised by a group of Abyssinian Metals shareholders, who are fighting a boardroom and courtroom battle to remove the Australian developer's board. Want to read more?

.

Where is lithium found in Ethiopia?

In Ethiopia lithium minerals (lepidolite, spodumene) are found together with tantalite in the Kenticha pegmatite deposit (Tadesse, 2001). No economic extraction of lithium exists in Ethiopia at the moment; the pegmatite deposit is only mined for niobite/tantalite.

Are there power stations in Ethiopia?

This page lists power stations in Ethiopia, both integrated with the national power grid but also isolated ones. Due to the quickly developing demand for electricity in Ethiopia, operational power plants are listed as well as those under construction and also proposed ones likely to be built within a number of years.

Will Kenticha mining become the first producer of lithium in East Africa?

Kenticha Mining (KMPLC) is poised to become the first producer of lithium in East Africa, with production scheduled to commence within the next three months. The company has already invested Birr 80 billion in the project, which is anticipated to generate 1,000 job opportunities.

How many tons of lithium can a kmplc plant produce?

The plant is expected to arrive in Ethiopia in September and will have a

production capacity of 270 tons of lithium per hour. KMPLC has already entered into an agreement with a Saudi Arabian company to supply lithium products, and discussions are underway with other potential buyers.

Does kmplc have lithium in Kenticha?

Ali Hussein, a Board Member of KMPLC, stated that extensive efforts have been undertaken to identify and confirm the presence of lithium in the Kenticha area. Samples have been sent overseas for testing, and the company is confident in the discovery of a significant lithium deposit. The company aims to generate USD 1.2 billion from annual exports.
