## Overview

---

What is the UK's largest solar & battery storage project financing?

The financing is the largest solar + battery storage project financing ever closed in the UK and was arranged in two tranches, with the term loans for the solar PV completed in August 2024 and for the BESS facility in March 2025.

Who financed the solar PV project?

This was organized in two tranches according to Quinbrook, with term loans for the solar PV completed in August 2024 before the BESS facility was agreed in March 2025. Lloyds and NatWest are the banks providing finance. Revenue contracts were critical to underwriting the project financing, Quinbrook has claimed.

How many solar PV projects will Sonnedix build in 2022?

London, UK – Sonnedix, the global renewable energy producer, has started construction of a 300MW portfolio of five solar PV projects. The portfolio, acquired by Sonnedix in December 2022, will contribute to the country's supply of secure and clean electricity.

Can London get more solar?

The Mayor's Solar Action Plan sets out how City Hall programmes are expected to more than double London's current solar energy capacity. But the Mayor thinks London can, and should, go further than this and wants to provide support to local government, businesses and others to install more solar in London.

Will TfL be able to power London's Tube network with solar?

Rosie Allen, Policy Adviser at the Green Alliance, said: "It's exciting to see this innovation into powering London's Tube network with solar. TfL is continuing to trailblaze on sustainable transport.

## Can a solar farm connect to the London Underground?

Transport for London (TfL) is seeking a delivery partner to work collaboratively to develop purpose-built solar farms to connect to the London Underground network, with opportunities for a broader connection to TfL's estate. Bidders are invited to participate in a competitive tender, which opens from 31 October.
