

SolarInvert Energy Solutions

London s largest energy storage project

Overview

London, 18th February 2025 — BW ESS has announced the energisation of its innovative 100MW / 331MWh battery energy storage system (BESS) near Bramley, Hampshire. Is Intergen planning a battery energy storage project?

InterGen, which currently supplies around 5% of the UK's power generating capacity, has been granted consent by the UK's Department for Business, Energy and Industrial Strategy for a battery energy storage project as part of their Gateway Energy Centre development on the banks of the river Thames in Essex.

What is the world's largest battery project?

In terms of international context, the world's largest battery project already under development is Vistra Energy's Moss Landing project in California, which is permitted for an eventual 400MW / 1,600MWh, to be built in phases. The world's largest project in operation today is the Gateway project developed by LS Power, also in California.

How big is the UK's biggest battery?

According to the company, this puts it at 10 times the size of the largest battery currently operating in the UK. Indeed it will dwarf the UK's biggest active project so far, the 50MW / 75MWh Thurcroft battery storage site in South Yorkshire, which was recently acquired by stock exchange listed specialist fund Gresham House Energy Storage.

Will Bess be largest on UK grid?

BESS at Thurrock Flexible Generation site expected to be largest on UK grid when commissioned. Statera Energy has secured \$512 million (GBP 395 million) of debt financing for a UK storage and flexible generation project comprising a 300 MW/600 MWh battery energy storage system (BESS) co-located with a 450 MW gas-fired plant.

What is Gateway Energy Centre?

Gateway Energy Centre is the UK's largest battery energy storage project. With an ultimate capacity of 450 MW (900 MWh), the facility represents a significant piece of system architecture in the UK's transition to net zero.

Where is the UK's largest natural gas generator?

The Edinburgh-headquartered independent energy generator currently supplies around 5% of the UK's generating capacity, with natural gas sites in Coryton in Essex (800MW), Spalding in Lincolnshire (1,250MW) and Rocksavage in Cheshire (810MW). A version of this story for local audiences was first published on Solar Power Portal .
