

SolarInvert Energy Solutions

Majuro Distributed Energy Storage Company

Overview

Why does Majuro need a new power system?

In order to stabilize power service, the Marshalls Energy Co. was forced to import more than half-a-dozen rental containerized generators last year that currently provide the backbone of Majuro's power. International donors and the Marshall Islands government have lined up to fund a huge overhaul of the power system for Majuro.

How many generators does Majuro have?

The Majuro diesel power station 1 was commissioned in 1984. It is the smaller of MEC's two power stations servicing Majuro. A total of five diesel generators are installed in the station, comprising of four original Peilstik generators and in 1992 a single Caterpillar generator was added.

How much power does a Majuro system use?

The Majuro system has a (2023) recorded maximum demand of around 9.8 Megawatts, with a daily average of 9.0 Megawatts.

What is distributed energy storage?

The company's distributed energy storage solutions combine massive arrays of industrial-strength lithium-ion batteries with specialized software and control systems to enable flexible energy optimization.

What is ABB distributed energy storage?

ABB provides a Distributed Energy Storage (DES) system, a packaged solution for storing energy for later consumption. The two essential components of the system are the DC-charged batteries and the bi-directional inverter. This equipment is enclosed in a shipping-friendly shell that can tolerate harsh conditions.
