Overview

What is the future of solar energy in the Philippines?

The journey towards sustainable energy sources in the Philippines is rapidly advancing, with solar photovoltaic (PV) manufacturing at the forefront. Plans to establish three to five gigawatt (GW) scaled module assembly facilities by 2030 aim to meet domestic and international needs.

Who makes solar panels?

REC Group. Based in Norway, REC Group was founded in 1996 and has since become one of the world's leading providers of solar energy solutions. Kioto Solar. Founded in 2007, Kioto Solar is an Austria-based provider of solar thermal and PV systems. Photowatt. Photowatt is a manufacturer of photovoltaic panels from France. Victron Energy.

What is the solar energy capacity in the Philippines?

As of 2021, the country's solar energy generation capacity is at 1.2 GW. The solar power market in the Philippines takes on a liberal approach. It is also regulated through the Republic Act No. 9513 that promotes the development, utilization, and commercialization in the harnessing of renewable energy sources in the country.

Is the Philippines' solar panel industry ready for significant growth?

As we explore the implications of this expansion, it's clear that the Philippines' solar panel industry is ready for significant growth in the region. With an investment of US\$150 million to US\$250 million expected in the coming years, the solar panel manufacturing industry in the Philippines is poised for significant growth.

Will the Philippines reach its target solar capacity by 2030?

The government has already expressed its plan to deploy more solar PV installations in order to reach its target solar capacity by 2030, as outlined in

the National Renewable Energy Program. There are several manufacturers of solar power equipment in the Philippines.

Why does the Philippines have a growing solar market?

The Philippines' growing solar market is due in part to the Philippine Energy Plan that has outlined the policies and steps needed for the country to reach its target of 20 GW renewable energy by 2040 (or 15 GW by 2030). As of 2021, the country's solar energy generation capacity is at 1.2 GW.
