# Manila Power Energy Storage Battery

## Overview

---

What is Masinloc battery energy storage?

We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES Philippines. The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia.

Can energy storage drive the modernisation of power infrastructure in the Philippines?

Energy storage is a technology that can not only drive the modernisation of power infrastructure in the Philippines, but also attract investors in the country's economy. "However, as a utility developer, we are looking at challenges in the implementation of the policy framework, and at technology challenges," Briones said.

Is energy storage a key enabler for the Philippines' 'ambitious' energy goals?

The government sees energy storage as a vital enabler for the Philippines' "ambitious targets" for renewable energy, Marasigan said, aiming for 35% renewables in the energy mix by 2030, 50% by 2040 and continuing to rise from there.

When is Trina Elementa 2 Pro 5MWh battery energy storage system coming to Philippines?

MANILA, Philippines, May 16, 2025 /PRNewswire/ -- Trina Storage, the energy storage division of global solar leader Trinasolar, will introduce its next-generation Elementa 2 Pro 5MWh Battery Energy Storage System (BESS) to Philippines at Solar & Storage Live Philippines 2025, on 19-20 May at the SMX Convention Center in Manila.

What is battery energy storage system (BESS)?

The Battery Energy Storage System (BESS) is part of a hybrid project combining a 16 MW wind power facility and the battery storage provided by Gamesa Electric. We supplied, installed and commissioned the complete energy storage system consisting of two Gamesa Electric Stor PCS charger stations and two Stor DC battery stations. The project also [ . ].

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.
