Maputo Communications 5G Base Station Distribution Points

Overview

Where is Vodacom launching 5G services in Mozambique?

Maputo, capital city of Mozambique. (Image source: Shutterstock) Vodacom has launched Mozambique's first 5G network. The mobile network operator plans to deploy 5G services at selected sites in Maputo, Matola; the central area of Nampula; downtown Nacala, Manhava, Maquinino and Chipanga neighbourhoods; Beira; and Tete.

Does Mozambique have a 5G network?

Mozambique now has a 5G network, as Vodacom, the country's major mobile network provider, has launched it in several locations. These include Maputo, Matola, Nampula's downtown, downtown Nacala, the Manhava, Maquinino, and Chipanga neighborhoods, as well as Beira and Tete.

Who operates the 5G network in Mozambique?

The 5G network in Mozambique is operated by DiploFoundation. Vodacom, Mozambique's major mobile network provider, has launched the first 5G network in the country and plans to set up services at a few locations including Maputo, Matola, Nampula's downtown, downtown Nacala, the Manhava, Maquinino, and Chipanga neighborhoods, as well as Beira and Tete.

How will 5G impact Mozambique?

The telco's CEO, Nuno Quelhas stated that 5G would help improve the quality of life and promote the growth of the youthful population. "5G would help to expand financial inclusion in Mozambique, as the aim is to cover 75% of the adult Mozambican population by 2025 and make payments through M-Pesa available anywhere in the country," he added.

Why is Vodacom launching 5G in Africa?

Vodacom is enthusiastic about providing African communities with improved network connectivity and promoting integration into the global digital

economy (Why: Africa). The deployment of 5G is anticipated to improve living conditions, foster the growth of the young population, and enhance financial inclusion.

How are 5G measurements done?

Regarding the collection of 5G measurements, it is done in the same way as for the previous technologies by our App users, with the difference that these users must of course be equipped with mobile and SIM card both 5G compatible. These measurements are therefore carried out in real conditions, directly in the field.
