Mauritania High Frequency Uninterruptible Power Supply

Overview

What is uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS power supply system) has been widely used in modern life, providing effective emergency power for various electronic devices, protecting them from power instability interference, and ensuring their normal operation.

What is the electricity sector like in Mauritania?

The electricity sector in Mauritania is characterised by a fragmented electricity network, low electricity access rates, and an imbalance between supply and demand.

What are the characteristics of contactless electronic regulated power supply?

The contactless electronic regulated power supply has the characteristics of high performance, high efficiency and energy saving, no electromagnetic interference, small size, light weight, fast response speed, and easy maintenance.
