Mauritius Energy Storage Frequency Regulation Project

Overview

The government of Mauritius has welcomed the commissioning of a 20MW battery storage project which will provide frequency regulation to the East African island nation's grid. Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

What is Mauritius aiming to reduce dependence on?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by, reducing the country's dependence on coal and heavy oil for electricity generation.

Why is Mauritius facing a rise in fossil fuels?

The country, located off the coast of East Africa, is facing a rise in fossil fuels due to the current energy crisis. Qair Group already operates three solar PV and wind energy farms in Mauritius with a combined capacity of 35 MW.

Does Qair Group operate solar energy farms in Mauritius?

Qair Group already operates three solar PV and wind energy farms in Mauritius with a combined capacity of 35 MW. The group founded by Jean-Marc Bouchet has a combined renewable energy capacity of 860 MW operational in Africa, South-East Asia, South America, and Europe.
