

SolarInvert Energy Solutions

Mauritius edf power group energy storage

Overview

Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

How will EDF Group contribute to the development of new storage systems?

With the storage plan, EDF Group intends to develop 10 GW of new storage systems worldwide by 2035. R&D is contributing fully to this objective. As part of this, it has laboratories dedicated to battery research. Experts work on battery performance and their contribution to the expansion of renewable energies in electricity systems.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

What does EDF Group do?

The EDF Group has been working on electricity storage for many years. With the storage plan, EDF Group intends to develop 10 GW of new storage systems worldwide by 2035. R&D is contributing fully to this objective. As part of this, it has laboratories dedicated to battery research.

What is Mauritius aiming to reduce dependence on?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by, reducing the country's dependence on coal and heavy oil for electricity generation.
