## Overview

---

Which portable power station supports charging with solar panels?

It also supported charging with solar panels. Unfortunately, it's no longer available for sale. EcoFlow Delta Pro (3,600Wh): The EcoFlow Delta Pro is one of the largest portable power stations on our list at 3.6kWh (expandable up to 25kWh), and also happens to be one of the fastest charging.

Are oupes Mega 1 portable power stations a good choice?

The Oupes Mega 1 is an excellent choice for those seeking a high-value, expandable 1kWh portable power station that doesn't skimp on charging speed or output power. It's well-suited for RVers, campers and for providing home backup for essential devices.

Can a portable power station be used as an uninterruptible power supply?

Yes, a portable power station can be used as an uninterruptible power supply. Many portable power stations come with UPS features, like automatic switchover when power loss is detected.

What are the performance metrics for portable power stations?

Currently, we look at two main performance metrics for portable power stations: charge time and discharge capacity. Every company that sells portable power stations provides the expected number of watt-hours its products are supposed to last. That can vary from as low as 240 watt hours to as many as 2,000 watt hours for a larger power station.

How much power does a 2,000 watt power station use?

Given those losses, you can expect to get about 85 percent of a power station's listed watt hours in usable power. So, a fully charged 2,000Wh power station will typically give you about 1,700 watt hours of usable power.

What is the most expensive portable power station?

The one downside is the price tag, as this unit also comes through as the most expensive portable power station with a list price of \$4,250. Milwaukee M18 Carry-On Power Supply: It isn't a great portable power station. You're probably considering buying it because you're already on the platform. If that's the case, I say go for it.
