

## SolarInvert Energy Solutions

# Mongolian solar tiles

## Overview

---

Can solar panels be used in Mongolia?

Mongolia's unique environment is perfectly situated for the use of solar panels. Mongolia has a dry climate, with long, cold but sunny winters, dry hot summers, low precipitation, and large temperature fluctuations. It is estimated that the country has 260 sunny days (Fassnacht et al., 2011) or 2791.5 hours of sunshine per year.

How much does Mongolia's solar energy project cost?

It builds upon the success of the SHS systems and plans \$54.4 million USD for supplying nine of the country's provinces with energy grids, and installing Mongolia's first large-scale build photovoltaic solar energy (PV) plant. Note that this system would not be mobile, but rather a large solar farm in the Gobi.

When were solar home systems available in Mongolia?

Solar home systems were for sale in Mongolia by 1992, and perhaps earlier. Many of these systems were donated to Mongolia. For example in one early donation, between 1992 and 1996 Japan provided 200 solar power generators to herding families.

Will Mongolia's energy sector double in capacity by 2030?

Speaking at the 95th anniversary of the establishment of Mongolia's energy sector, Minister of Energy, P. Gankhuu anticipated that Mongolia's energy sector will double in capacity by 2030, with an estimated 30% of the power coming from renewable energy (Government of Mongolia, 2017 ).

Can solar power be used for nomadic herders in Mongolia?

Capturing the Sun in the Land of the Blue Sky: Providing Portable Solar Power to Nomadic Herders in Mongolia. No. 72683. The World Bank, 2012. Kapadia, K. The Not-So-Sunny Side of Solar Energy Markets: A Case Study of Sri Lanka.

2003. University of California, Berkeley Masters Project.

How can Mongolia achieve a brighter and greener future?

By harnessing its rich renewable resources and implementing inclusive policies, Mongolia can secure a brighter, greener future for all its citizens. The UNDP remains committed to supporting Mongolia in this vital transition, ensuring that the shift to clean energy benefits everyone, leaving no one behind.
