

## SolarInvert Energy Solutions

# Morocco container ship generator model

## Overview

---

What is a containerized diesel generator?

Discover the containerized diesel generators at DINGBO Power, offering a mobile and secure power solution for a wide range of applications. These generators are housed in robust containers, providing enhanced security and portability. Ideal for use in remote, outdoor, or temporary sites, they ensure reliable power delivery in any setting.

How is shaft generator power determined for container ships?

Based on the collected technical and operational data for container ships of various load capacity, constructed between 2000 and 2015, and by applying different analytical and statistical methods the parameters have been determined. Shaft generators' power has been established in relation to the power of main engines.

What is a shipping container generator?

Housed within standard shipping containers, these generators offer a seamless integration of the generator set and its associated equipment, providing a robust solution that combines aesthetics with functionality.

Does a ship need a generator?

As ship sizes increase, so do their propulsion systems, requiring that stable and high-efficiency power must continuously be supplied. In general, ships' operations require power lower than the installed generator capacity. However, when the generator is operated at a low load, its efficiency decreases.

Does a generator maximize space utilization and efficiency of a ship?

The proposed strategy maximizes the space utilization and efficiency of the ship while minimizing the generator's power consumption. The generator's fuel consumption, operating time, and efficiency were compared and analyzed

to verify the proposed strategy's efficacy.

How much power does a container ship use?

The ship can load 1200 FEU (forty-foot equivalent unit) refrigerated containers and consumes approximately 7440 kW of power when operated at the maximum load. Figure 1 shows the power system of the target ship, and Table 1 lists the specifications of the ship. Figure 1. Power system of the target container ship. Table 1.
