Morocco emergency energy storage vehicle equipment

Overview

What is Morocco doing in the EV sector?

Additionally, Morocco is actively forming new strategic partnerships in the EV and energy sectors, affirming its dedication to spearheading fully decarbonized automotive supply chains. This strategic alignment places the country at the forefront of 21st-century economic policy.

What role does Morocco play in the EV transition?

Morocco's role in the EV transition is diverse, capitalizing on its status as a global leader in RE, proficiency in automotive manufacturing, proximity to the EU market, and access to crucial raw materials for battery production.

Is Morocco preparing to launch a 1.6 GW Bess project?

Morocco is preparing to launch a massive foray into clean energy with its ambitious 1.6 GW BESS projects. The National Office for Electricity and Drinking Water (ONEE) is expected to invite tenders for battery energy storage systems (BESS) totaling nearly 1,600MW.

What EVs are made in Morocco?

In addition, companies like NEO Motors exemplify the country's ambition to promote Made in Morocco products. EV production in Morocco is still in its infancy. The country currently produces 40,000 to 50,000 EVs annually including the Mini EVs Fiat Topolino, Opel E-Rocks and Citroën Ami (see Figure 2).

How can Morocco accelerate EV adoption?

Outline strategies to strengthen the overall EV ecosystem in Morocco and accelerate EV adoption, particularly by electrifying public transport, shared fleets, two- and three-wheelers, and low-speed electric vehicles (LSEVs).

How many cars are there in Morocco?

4 By the end of 2023, Morocco's automotive landscape featured a total of 6,646,028 vehicles, including 2,936,528 passenger cars, 2,481,486 motorbikes, and 1,228,014 commercial vehicles. Battery electric vehicles (BEVs) totaled approximately 1,457, and hybrid electric vehicles 24,176, supported by about 290 charging stations.
