

SolarInvert Energy Solutions

Moscow uninterruptible power supply custom manufacturer

Overview

What is an uninterruptible power supply system (UPS)?

UPS. The modern uninterruptible power supply systems (UPS) are designed for the equipment protection from all possible problems that may occur in the power grid. Our UPSs are the ideal devices for the protection systems where the grid failure may have the catastrophic character.

Which power supply systems are used in Russia?

The power supply systems are fully agreed with the operational conditions, accepted on the territory of the Russian Federation. Only the modern high tech units are used for the power supply system production, supplied by Eaton. UPS.

Who makes ippon power supplies?

The company Ippon (Krasnogorsk), founded in 2001, specializes in emergency power supplies for computer systems and medical equipment. The company offers high-quality products from the world's leading manufacturers of computer components and electronics.
