New French photovoltaic solar panels

Overview

How many solar panels did France install in 2024?

France installed around 3.32 GW of new PV systems in the first nine months of 2024. From pv magazine France France deployed around 1,351 MW of new solar capacity in the third quarter of 2024, according to new figures from French grid operator Enedis.

How many solar panels are installed in France?

The total installed capacity in mainland France now stands at 24.4 GW. However, the ministry notes that this represents only 52% of the cumulative capacity targets set for the end of 2025. For a deeper dive into France's solar progress, explore this France Solar Panel Manufacturing Report.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

How much solar power does France have?

This expansion brought the country's total solar capacity to 25.5 GW. Solar production in mainland France also rose by 48% year-on-year, contributing 5.1% to the national electricity mix. France's solar power sector has achieved a significant milestone, installing 1.4 GW of new solar capacity in the first quarter of 2025.

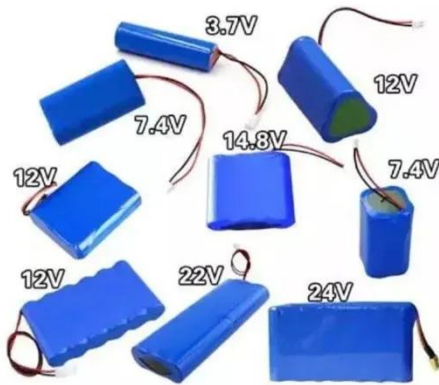

How much solar power does France have in 2025?

In the first quarter of 2025, France added 1.4 GW of solar capacity, marking a 60% increase from the previous quarter. This expansion brought the country's total solar capacity to 25.5 GW. Solar production in mainland France also rose by 48% year-on-year, contributing 5.1% to the national electricity mix.

What are the most significant solar power farms in France?

We'll be taking a close look at 15 of the most significant solar power farms in France below. Built by French renewable energy giant Neon, the Cestas Solar Park is France's largest operational solar project at the moment with an enormous 300 MW of total solar capacity.
