

SolarInvert Energy Solutions

New Zealand small power inverter manufacturer

Overview

What is a victron Energy Phoenix inverter?

Victron Energy Phoenix Inverters. Pure sine wave output, high peak power and high efficiency. Combined high frequency and line frequency technologies ensure the best of both worlds: smooth sine wave and rugged design. 12/24/48 Vdc models with 230 or 120 Vac output. (Please contact us for 120 Vac Models).

What is a solar inverter?

A solar inverter converts the energy output from solar panels into a usable electricity form, to be used in your home or business. Our range includes grid-tied, hybrid and off-grid inverters. A Grid-tied Inverter is designed to connect to supplement your home or business' mains power.

What types of inverters are available?

Our range includes grid-tied, hybrid and off-grid inverters. A Grid-tied Inverter is designed to connect to supplement your home or business' mains power. When there is solar energy to use, the system will deliver it and when there is insufficient energy to deliver, the system will switch back to grid power.

Are Energizer® Force s series Inverters a good choice?

Sleek, reliable and compact, the Energizer® Force S Series inverters are precision engineered to provide maximum performance, efficiency and longevity. The Force S Series has 5 power options available in 7kW to 10.5kW making them a suitable choice for mid-power sized solar ecosystems. High Performance Three-MPPT Inverters.

What type of inverter does victron offer?

12/24/48 Vdc models with 230 or 120 Vac output. (Please contact us for 120 Vac Models) Please contact us for 12/24 vdc models with IEC Outlet. Selected models with parallel connection capability for high output and/or 3-phase /

split-phase applications For more information on all of our inverters see our [Victron Inverters Product Information](#) page.

What is a utility scale modular inverter?

Utility scale modular inverters for solar and energy storage utilising the very latest modular design. Available in models ranging in size from 1525kVA – 4390kVA, 1500VDC. A comprehensive range of AC and DC electric vehicle (EV) chargers including our NB Station, which consists of a central power station that supplies energy to recharging posts.
