North America Battery Pack Factory

Overview

Are EV batteries coming to North America?

The electric vehicle revolution has a side anybody can see on the street, as well as on dealer lots. There's also a supporting side that we're here to discuss: the massive EV battery factory expansion currently taking place in North America.

How many battery factories are there in the United States?

Today there are about 34 battery factories either planned, under construction, or operational in the country. Former U.S. President Joe Biden's Inflation Reduction Act (IRA), signed into law August 16, 2022, might not have been the initial catalyst behind the onshoring battery factory trend.

Where will EV batteries be made in 2026?

The reshoring and building of a domestic lithium battery supply chain is in full swing in the U.S., with a bevy of new EV battery manufacturing plants and factories coming online by 2026. #1 - Tesla Gigafactory Nevada will be the largest EV battery factory in the U.S. in 2025 with an expanded capacity of 100 GWh (up from 37 GWh).

Which state has the largest EV battery factory?

#1 - Tesla Gigafactory Nevada will be the largest EV battery factory in the U.S. in 2025 with an expanded capacity of 100 GWh (up from 37 GWh). The states with the most EV battery factories are Michigan, Tennessee, South Carolina, and Georgia, which are known as the "Battery Belt".

Where are Volvo batteries made?

Volvo has a battery assembly factory in Charleston, South Carolina, but the automaker does not manufacture batteries or battery components there. Volvo would not confirm any other plans it has for battery production in North America.

Where are Panasonic EV batteries made?

The facility in De Soto will be Panasonic's second EV battery plant in the U.S., after the Panasonic Energy of North America (PENA) facility in Sparks, Nevada, which operates inside Tesla's Nevada Gigafactory and supplies the EV maker with batteries. Panasonic said in June 2023 that it plans to expand production at PENA by 10% within three years.
