# North Cyprus communication signal base station

## Overview

---

When did Cyprus become a listening post?

It was not until June 1947 that the full potential of Cyprus as a listening post started to be exploited, with the transfer of British personnel and equipment from Palestine and the creation of the Ayios Nikolaos Station near Famagusta, to house the 2 Wireless Regiment, later renamed as the 9 Signal Regiment.

What is the main road from Larnaca to Famagusta?

The main road from Larnaca to Famagusta runs through the village. The village is in a bubble of British territory surrounded by the territory of the Republic of Cyprus and connected to the main area of the Dhekelia Garrison only by a road, which road belongs to the SBA.

What is the Green Line in Northern Cyprus?

The village site stands at the very edge of the "Green Line", the United Nations buffer zone between Turkish-occupied Northern Cyprus and the rest of the island, and a crossing point stands here, controlled on the one side by Sovereign Base Areas Police and on the north by the police of the de facto Turkish Republic of Northern Cyprus.

How many SBAS did Britain have in Cyprus?

[. ] Under the terms of the 1960 independence treaties, Great Britain was allowed to retain two "Sovereign Base Areas" (SBAs) and several isolated sites scattered throughout Cyprus, such as the RAF radar dome on Mt. Olympus, the island's highest point, and various antenna arrays in Ayios Nikolaos, near Famagusta.

How did the Incirlik Air Base connect to Cape Greco?

It ran from Norway through the UK and France, Italy, Greece and Turkey, where the Incirlik Air Base was linked with Cape Greco via troposcatter antennae. Cape Greco was in turn connected via microwave link to the RAF

radar on top of Mount Olympus, providing NATO with live coverage of the airspace in the area.
