Does Cape Town need a solar inverter?

From 1 October 2023, Cape Town will require that new applications for solar PV and battery systems connected to a building's wiring use a city-approved inverter and obtain professional clearance. It will also refuse applications for standby and off-grid systems.

Why should you choose an off-grid solar system in Cape Town?

Nevertheless, battery costs are reducing at a high rate, so the demand for an off-grid solar system is now increasing, even in cities and towns. There are many advantages to an off-grid system Cape Town. The climate on the West Coast is perfect for solar production.

Why should you choose an off-grid system in Cape Town?

There are many advantages to an off-grid system Cape Town. The climate on the West Coast is perfect for solar production. It's also the best way to avoid power outages when Eskom can't produce enough electricity. They are also the best way to produce electricity if you live in rural areas where a grid connection is not an option.

Can an off-grid inverter be connected to the grid?

An off-grid inverter can also be connected to the grid but is not designed for this purpose. Whereas a hybrid inverter can use a mix of solar and grid electricity, an off-grid inverter can only use one source at a time. If your solar capacity becomes insufficient, an off-grid inverter will automatically switch to grid-only power.
