Outdoor power supply construction site work

Overview

Why do construction sites need a temporary power supply?

A temporary power supply ensures that construction sites have the power necessary to run tools, lighting and equipment. This not only makes the work go faster, it improves safety and comfort on site. How to Set Up a Temporary Power Supply Temporary power poles allow you to access the mains grid without installing permanent utilities connections.

How does temporary power work on a commercial construction site?

In order to shed a bit more light on the role that temporary power plays on a commercial construction site, let's take some time to picture how it works. In simple terms, a temporary power system is a network of electrical equipment that is designed to generate and safely transport electricity that will be used to power downstream equipment.

When is electricity supplied to the construction site?

Electricity to the construction site is only supplied during the project. When the project is completed, the power source, such as a commercial generator, is removed. It's when the permanent power supply kicks in. It's only intended to be used to power tools, equipment and illuminate work trailers.

Do you need a power source for a construction site?

Safety systems like cameras and alarms likely need a power source, as well. Site offices: Many construction sites have temporary office setups. These facilities will need power for lights and office equipment. As you think about temporary power for your next project, you'll want to keep in mind a few challenges that might arise.

Does a construction site need temporary power?

Without temporary power, most construction sites would be at a standstill. Most of the machinery, tools and equipment you use throughout a project

need a power source, but what are the best temporary construction power options for your needs?

.

Do I need temporary power poles for my construction site?

Your construction crew and subcontractors are scheduled to begin work in a month or two. Yet, you still haven't secured temporary power for your construction site. Most likely, you'll need temporary power poles to get enough energy for the trailers and equipment on your job site. The first step is to consult the experts.
