Outdoor solar lights one solar panel and two lights

Overview

What are the best outdoor solar lights?

Determine what you need to be illuminated and where you have space to install outdoor lights to find the best outdoor solar lights for your space. Our top pick for most outdoor spaces is the AloftSun Motion Sensor Solar Landscape Spotlights. During testing, they withstood our durability tests, were easy to use, and were bright enough to read under!.

Are outdoor solar lights a good idea?

By carefully mapping out your space, outdoor solar lights can make your yard or garden feel as comfortable as your indoor living areas. When surveying your exterior's square-footage, note any pathways that may benefit from better lighting. "Solar lights for lining walkways or driveways are fabulous for design and utility," Agárdy says.

What are solar powered garden lights?

Solar powered garden lights are the glow-up your outdoor space deserves—no cords, no stress, just sun-powered magic. Whether you're dressing up your walkway, highlighting your favorite plants, or just want your patio to feel like a cozy retreat, solar lights make it happen—with style and zero impact on your energy bill.

What are the different types of outdoor solar lights?

Based on their light output, outdoor solar lights fall into three general types: motion-activated, dusk-to-dawn, and timer-controlled. Because of solar cell size and battery capacity, the solar energy gathered is a limited resource, so consider when you want the lights to shine and for how long.

How many solar lights are there?

Over the past two years, we've tested 62 different outdoor lights (you read that right) including solar pathway, smart, spotlights, lanterns, wall-mounted,

and string lights. We became solar light experts, if we do say so ourselves.

Can solar lights be used outside?

This style is often used for floodlights or specific lighting needs, such as outside your back door. Where you want to use solar lights determines how you install them—"Brick lights are great for illuminating gardens and pathways, as they can be installed into pavement or dirt," Knopfler says.
