## Overview

---

Is TP-Link a good wireless base station?

TP-LINK's 5GHz 300Mbps \* Outdoor Wireless Base Station is specifically designed to provide an effective solution for outdoor wireless networking applications. With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage.

What is Cerio outdoor access point?

Cerio's outdoor Access Point support any environments and special applications for point-to-point or point-to-multipoint deployment as well as an outdoor recreation area for customer wireless services. Use Cerio's outdoor access point goes to service high customer traffic area can withstand a large number of wireless users.

What are Cisco Aironet access points?

Optimize for a more secure and flexible network—even in highly demanding industries with unforgiving outdoor and industrial environments. Then make better decisions with insights and easy management. Cisco Aironet access points offer real-time access in outdoor locations using 802.11n, Cisco CleanAir technology, RFI and more.

What makes the Pharos series a good base station?

To maximize performance and stabilize long distance wireless transmission, the Pharos Series is built with Qualcomm Atheros enterprise level chipsets, high gain-antennas, and high-power amplifiers. In addition to excellent internal components, Pharos Series Base Stations also feature specially designed, weatherproof enclosures and PoE capability.

What are the advantages of outdoor access point?

Powerful network security: In addition to standard wireless encryption, the

outdoor access point also built-in a RADIUS server with 802.1X authentication. The device can record a detailed log of client and device activity. More. High power design of Access Point.

Does wbs510 work with TP-Link?

Two external RP-SMA antenna interfaces allow the Outdoor Wireless Base Station to integrate seamlessly with TP-LINK's line of sector and dish antennas. Where long- distance wireless data transmission is necessary, the WBS510 can be paired with a TP-LINK dish antenna, allowing it to transfer data over distances of up to 50 km \*.
