Papua New Guinea Economic Development Energy Storage Project

18650 3.7V
Li-ion
RECHARGEABLE BATTERY

2000mAh

Overview

The project encompasses the construction of a solar and battery energy storage system (BESS) minigrid to be built on the island of Buka, within the autonomous region of Bougainville in Papua New Guinea. What is Papua New Guinea's energy project?

The project will bring electricity to rural households; expand renewable energy generation; support the modernization of the country's electricity infrastructure; and benefit households, businesses, and communities across the nation. "This project represents a major step forward for Papua New Guinea's energy future.

What are development projects in Papua New Guinea?

Development projects in Papua New Guinea span from the capital to the country's poorest areas, involving foreign firms and international aid groups in a cross-sector approach to development. – Giacomo Tognini Photo: Flickr.

What is PNG's economic development strategy?

PNG's Climate-Compatible Development Strategy combines economic development with mitigation and adaptation. The strategy aims to achieve a GDP per capita of USD 3,000 by 2030, as set out in Pillar 5 on climate change Mitigation. This economic development goal is part of PNG's Vision 2050.

What is the Papua New Guinea development strategic plan?

THE Papua New Guinea Development Strategic Plan (PNGDSP) 2010-2030 defines a 'high quality of life for all Papua New Guineans' as its ultimate goal. Towards achieving this, the assumptions about economic growth and income as definitive measures of social and economic wellbeing in PNG are promoted exhaustively in the writing of the PNGDSP.

Does PNG have low electricity access?

With only 20 percent of PNG's population connected to the grid, the project

addresses the significant challenge of low electricity access, particularly in rural areas where less than 15 percent of people have access to electricity.

What are png's climate targets?

PNG's climate targets and the utilization of its abundant renewable energy resources. PNG's Nationally Determined Contribution (NDC) includes the target of reaching 78% renewable energy capacity in the power sector by 2030. Currently, roughly 50% of power generation capacity in PPL's main grids are run on renewable power.
