Our products are fit-for-purpose, having been tested and proven in the harshest conditions across Papua New Guinea. Whether for land, marine, or industrial applications, TE PNG has the expertise and technology to keep you connected. Stay up to date.

How difficult is telecommunications reform in Papua New Guinea?

Telecommunications reform, specifically reform of the market for mobile phone services, has been adopted in five Pacific island economies in recent years. Reform of this market in Papua New Guinea (PNG) was perhaps the most difficult of the five cases, particularly with respect to the political struggle over the nature and pace of the reform.

What is png's information and Communication Technology Policy?

One of the key objectives of PNG's information and communication technology (ICT) policy has been the provision of access to telecommunications for all users, with particular emphasis on the rural population.

Can regulatory capture lead to reform in PNG?

This study also illustrates the problems that regulatory capture can give rise to in trying to bring about reform. PNG's Independent Consumer and Competition Commission (ICCC), which was initially given the power to issue licences to mobile phone providers, fought a gallant battle to ensure competition.
