

# Photovoltaic inverter back frame

## Overview

---

What is the Bentek inverter powerrack?

The Bentek Inverter PowerRack is a pre-fabricated mounting structure that supports string inverters, disconnects, combiners and other PV electrical BOS equipment. It was designed in consultation with leading inverter manufacturers to provide rapid and secure installation of string inverters in close proximity to the PV array.

What is solar panel framing?

Solar Panel Framing: advantages and disadvantages?

Solar panel framing refers to the process of attaching protective and strengthening frames to the PV laminates of a solar panel. How are solar panels framed?

How do I connect multiple inverters to a PV system?

When there is only one inverter in the PV system, connect the additional grounding cable to a nearby grounding point. When there are multiple inverters in the PV system, connect grounding points of all inverters and the PV array frames to the equipotential cable (according to the onsite conditions) to implement an equipotential connection.

What is a PV inverter shelter?

The PV Inverter Shelter offers a sturdy construction with a short assembly time. The shelters provide a perfect total solution for your cable management in combination with our other ValkCableCare products. It is available in three different configurations: Single, Double, or Wall. Download the datasheet.

What is a photovoltaic inverter (PVI) station?

It is based on the same best-in-class power conversion platform as our AMPS solutions, enabling greater scalability and flexibility. Hitachi Energy's Photovoltaic Inverter (PVI) station provides you with advanced control and power capabilities that are designed to meet complex technical requirements and the most challenging grid codes.

How do you install a solar inverter?

Install the inverter vertically or at a minimum back tilt of 10°. Forward installation or upside-down installation is prohibited. 1) Reserve enough clearance around the inverter to ensure sufficient space for heat dissipation, as shown in FIG 3-3.
