

## SolarInvert Energy Solutions

# Photovoltaic module panels produced in Cordoba Argentina

## Overview

---

Where is PV distributed in Argentina?

PV is distributed regionally in Argentina. Of the total 1,366 MW, the largest portion, 736 MW, is located in the northwestern part of the country, which includes the provinces of Jujuy, Salta, Tucumán, Catamarca, La Rioja and Santiago del Estero. These areas represent a little more than 20% of the country's territory.

What percentage of Argentina's electricity is generated by solar?

New figures from Cammesa, the state-owned company that manages Argentina's wholesale electricity market, show that solar accounted for 3.1% of total national generating capacity at the end of December 2023.

What is PS Cura Brochero solar PV Park?

PS Cura Brochero Solar PV Park is a ground-mounted solar project which is spread over an area of 73 hectares. The project generates 37,368MWh of electricity. The project consists of 90,000 modules, each with 330W nameplate capacity. The project construction commenced in 2022 and subsequently entered into commercial operation in October 2022.

How much does solar energy cost in Argentina?

The annual average Argentina solar potential for photovoltaic (PV) energy generation is approximately 1.6 MWh/kWp. <sup>2</sup> As of December 2023, the average residential electricity cost is approximately \$0.019 per kWh. For businesses, the average cost is about \$0.024 per kWh.

How much solar power does Argentina have in 2023?

From pv magazine Latam According to the latest monthly report from Cammesa, Argentina's state-owned electricity market operator, the country reached a cumulative installed PV capacity of 1,366 MW at the end of December 2023. Cammesa also revealed that the country added around 262

MW of newly installed solar power in 2023.

How much solar power does CAMMESA have in 2023?

Cammesa also revealed that the country added around 262 MW of newly installed solar power in 2023. Developers installed 33 MW of new PV capacity in 2022, compared to around 300 MW in 2021. At the end of December 2023, installed PV systems accounted for around 3.1% of total national generation capacity. PV is distributed regionally in Argentina.
