

## SolarInvert Energy Solutions

# Photovoltaic power generation and energy storage in Cote d Ivoire

Higher Anti-Rust Performance  
Lower Internal Impedance

Sturdy Handle

Insulating Cap

ABS Case

M8 Terminal

## Overview

---

In closing its economic gap with emerging markets, Côte d'Ivoire will face a substantial increase in electricity demand over the next three decades. Côte d'Ivoire has signed the Paris Agreement that aim.

Will a lithium-ion battery energy storage system be installed in Côte d'Ivoire?

A lithium-ion battery energy storage system (BESS) made by Saft will be installed at a 37.5MWp solar PV power plant in Côte d'Ivoire (Ivory Coast). It is the African country's first-ever large-scale solar project and the batteries will be used to smooth and integrate the variable output of the PV modules for export to the local electricity grid.

Why is Côte d'Ivoire launching a solar power plant?

"The solar power plant is regarded as a model project for the expansion of solar energy in Côte d'Ivoire. It is an important contribution to the fight against climate change and a decisive step towards increasing the share of renewable energies in the country's electricity supply to 45% by 2030," said KfW.

Where is a new solar plant in Côte d'Ivoire?

The recently inaugurated solar plant in Boundiali, Ivory Coast. Image Source: RMT, Eiffage Energie Système A new solar plant that can supply electricity to up to 35,000 homes has been inaugurated in Côte d'Ivoire. Located in Boundiali in the north of the country, the plant has already been providing up to 37MW of power since June 2023.

Will solar power supply increase in Côte d'Ivoire by 2050?

We develop a TIMES model of the electricity sector for Côte d'Ivoire that provides least-cost solutions for power systems. Our estimates show that electricity demand could increase by a factor of 4.5 by 2050. Least cost solutions show that solar PV could provide at least 18% of total electricity generation in 2050.

Will Côte d'Ivoire have a low-cost solar system?

In the case of a low-cost solar scenario, PV capacity is up to 24 GW and storage is nearly 15 GW between 2030 and 2050. In closing its economic gap with emerging markets, Côte d'Ivoire will face a substantial increase in electricity demand over the next three decades.

Will Côte d'Ivoire have a coal-fired power plant?

These aspects are left for further research. This coal-fired power plant is expected to be the first ever built in Côte d'Ivoire. Note that the implicit price of carbon for the other scenarios is not worth studying because they show CO<sub>2</sub> emissions in 2050 below the Paris Agreement target.
