Polish Communications Company 5G Base Station

Overview

Are mobile operators building 5G networks in Poland?

Mobile operators in Poland have been testing 5G technology and have begun preparations for building 5G networks. While early pilot projects were mostly based on Huawei technology, in later initiatives the operators have focused on Ericsson and Nokia.

Will Polish 5G be available to all operators?

In October 2019, the four leading mobile operators (Cyfrowy Polsat, Orange, Play and T-Mobile), the state-owned telecom operator Exatel and the Polish Development Fund (PFR) signed a memorandum of understanding to establish the Polish 5G which will manage the 700 MHz network, making it available to all operators.

Will Poland have 5G in 2021?

In 2021 Plus plans to offer 5G services using more than 1700 base stations in all present and former provincial capitals, as well as in many other towns and places. Thus, next year more than 11 million people will be able to enjoy the services of the fastest in Poland 5G 2600 MHz TDD network.

Will a 700 MHz network be incorporated into Polish 5G?

Integration of the 700 MHz infrastructure would considerably lower the cost and allow the operators to focus on the 3.4-3.8 GHz and 26 GHz networks. The business plan for Polish 5G is yet to be developed but the goal is to launch a country-wide wholesale 700 MHz network in 2023.

How many 5G stations are there in Poland?

A network of 100 transceivers will be operating in 7 Polish cities - Warsaw, Gdansk, Katowice, Lodz, Poznan, Szczecin and Wroclaw. The second stage of Plus 5G network development in Poland will be to provide coverage for the entire area of Warsaw and the towns and places around it, with over 600

additional 5G stations being constructed.

Why should you choose a 5G operator in Poland?

Plus is the only operator on Polish market to have allocated a dedicated 2600 MHz frequency band using TDD technology for 5G operations, thus increasing the network's throughput. The solution used for 5G network roll-out by the operator of Plus network is the world's most advanced technology.
