# Polish quality energy storage battery cost performance

## Overview

---

Is Poland moving towards battery energy storage systems (Bess)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

Will large batteries saturate ancillary services markets in Poland in 2025?

While the outlook for large batteries in Poland appears strong in 2025, Clean Horizon warns that this opportunity may not endure. Utility-scale storage can quickly saturate ancillary services markets, leading to a rapid decrease in opportunities for front-of-the-meter batteries.

What does ENEX 2025 tell us about energy storage in Poland?

The insights from Enex 2025 reinforce that BESS is no longer an emerging trend—it's a critical part of Poland's energy transition. With favorable market reforms and growing investment interest, the country is well-positioned to capitalize on energy storage innovations.

Is Poland a good country to invest in renewables?

Historically reliant on coal, Poland has lagged in adopting utility-scale renewables compared to neighboring countries like Germany. However, a significant shift is underway, and the market is poised for growth.
