How efficient is a power bank?

Power banks are about 60-70% efficient, depending on the phone's technology, so in our tests this power bank could charge an iPhone 15 to nearly full, but that big Ultra only got about 65% charge. That's just fine, because this power bank was the perfect pocket companion to keep us going through a busy day.

Do you have a power bank for your iPhone?

We've got power banks for power users that give you detailed information about the devices you're charging, or simple magnetic power banks that smile while your iPhone charges. You can find power banks large and small, premium and inexpensive. We've even got a power bank that doubles as a water bottle - with wireless charging, of course.
