

SolarInvert Energy Solutions

Power generation and energy storage in Lagos Nigeria

Overview

How can Lagos improve its energy supply & demand?

Commissioned by C40 Cities, Arup conducted an extensive study reviewing Lagos's current energy supply and demand, its projected future needs, and the potential of various renewable technologies. We recommended a suite of measures, including localised solar power generation, energy efficiency improvements, and battery storage solutions.

How much electricity does Lagos have?

Home to 18 million residents, Lagos has only 850-1,000 MW of installed capacity serving the national grid, which meets just 10% of the city's electricity demand. The remaining demand is being met by fossil-fuel generators, firewood, or individual renewable energy systems – such as solar panels and biofuel.

Why is electricity important in Lagos?

Electricity is crucial for Lagos' growth and development, as its economy is heavily reliant on energy for manufacturing and production, as well as services that are increasingly digitalized.

What is the solar energy potential for Lagos?

Solar energy potential for Lagos, measured by PV power output, ranges from 1,284 MWh to 1,409 MWh per year. The irradiation and ground-mounted Figure 13 PV System large-scale Data ranges from 1,754.1 kWh/m² per year for small residential, medium size commercial PV panels to 1,752.6 kWh/m² for floating large-scale PV panels.

Could solar photovoltaics meet 66% of Lagos's energy demand?

Solar photovoltaics combined with battery storage could meet 66% of Lagos's projected 2050 energy demand without significant infrastructure upgrades. Commissioned by C40 Cities, Arup conducted an extensive study reviewing

Lagos's current energy supply and demand, its projected future needs, and the potential of various renewable technologies.

What is Lagos energy resilience profile?

This Lagos Energy Resilience Profile outlines the state of the energy system in Lagos, to better understand key factors that contribute to the vulnerability and resilience of the energy system and other interdependent systems.

Power generation and energy storage in Lagos Nigeria

Lagos Targets Six Gigawatts In Three-Year Ambitious Clean Energy ...

Apr 16, 2025 · Lagos State has begun a journey to achieve energy independence with the target of six gigawatts in power generation over the next three years. This ambitious energy plan was ...
