

SolarInvert Energy Solutions

Pristina Outdoor Solar Electricity System

Overview

What is special about big solar Pristina?

However, what is special about Big Solar Pristina is the fact that the district heating network is completely switched off in the summer months, so that all the solar heat from the summer is temporarily stored in the seasonal storage for the heating period.

Will the EBRD cover big solar in Pristina?

The EBRD will cover EUR 23.2 million with a loan. The KfW has also financed the feasibility study that is about to be completed. An experienced team of heat network experts from the iC group and Solid Solar Energy Systems – both from Austria – has put all their knowhow together to adapt the Big Solar concept to make it suitable for Pristina.

What is the financing package for big solar Pristina?

The financing package for the EUR 80 million project was signed on 20 December in Pristina, Kosovo. The European Commission, the KfW banking group and the European Bank for Reconstruction and Development (EBRD) together with a local contribution will provide the investment costs for the multi-megawatt Big Solar Pristina plant.

Does Pristina have a heating system?

Currently, around 75 % of the buildings in Pristina are not connected to the city's district heating system and obtain heat by using the coal-based electricity in building-internal heating systems and by burning unsustainably sourced wood or lignite.

How will a district heating system improve air quality in Kosovo?

This will significantly improve the air quality in the city. Currently, the district heating system is supplied with heat from a brown-coal-fired combined heat and power (CHP) plant. The CHP blocks also supply 94 % of the electricity

used by the 1.87 million inhabitants of Kosovo.

What is a solar district heating system?

It refers to solar district heating systems that store surplus solar energy from the summer in seasonal storage for heating purposes in winter. As the scheme above shows, the solar circuit starts at the bottom of the seasonal storage where you find the lowest temperatures and ends at the top of it.

Pristina Outdoor Solar Electricity System

Pristina residential solar

By interacting with our online customer service, you'll gain a deep understanding of the various Pristina residential solar featured in our extensive catalog, such as high-efficiency storage ...
