

## **SolarInvert Energy Solutions**

# **Pristina Solar Air Conditioning Clothes Summer Model**

## Overview

---

Can solar-powered smart clothing be self-sustaining?

In a paper titled 'Self-sustaining personal all-day thermoregulatory clothing using only sunlight' published in the journal Science, researchers describe how they created solar-powered smart clothing using flexible solar cells and an electronic device.

Can a thermoregulatory clothing system cool polar regions?

But this can be difficult as the world's temperatures continue rising and in "harsh scenarios," such as frigid polar regions and even space travel. The team developed a thermoregulatory clothing system that combines an organic photovoltaic module with bidirectional electrocaloric devices that are capable of heating or cooling.

Can a cooling system be integrated into conventional clothing?

In the new work, scientists say that the system could be integrated into conventional clothing. Once it is added in, the device can provide 10.1 degrees Celsius of cooling, but also keep it 3.2 degrees warmer than bare skin alone.

Who are the coolest solar-powered fashion designers?

Discover fashion's coolest solar-powered moments thus far below. Dutch designer Pauline van Dongen is one of the coolest solar-reliant designers working today, having created everything from a couture collection to a parka using solar panels.

What is a solar dress & how does it work?

As Ecouterre explains, the dress comprises "448 white circuit board tiles that can be fitted with solar cells, LEDs, or photocells" and comes with an "attached microcontroller." By soaking up sunlight during the day, it allows the dress to glow at night to ensure anyone who wears it will stand out.
