Qc for rooftop photovoltaic panel installation

Overview

Do solar panels need a QC inspection?

Needless to say, it is imperative that solar panels are not only manufactured using high-quality components but that they also undergo stringent quality control inspections – whether through an in-house QC inspection or a third-party inspection – before shipment.

Why do we need a solar panel quality control inspection?

The solar power industry has been experiencing a huge boom in the wake of the Covid-19 pandemic, leading to a growing demand for solar panels, or photovoltaic panels – and as a result of this, there has also been an increase in the need for solar panel quality control inspection.

Why is QA/QC important for solar projects?

Implementing a comprehensive quality assurance and quality control (QA/QC) program during the pre-manufacturing and manufacturing phases is essential to the long-term success of solar projects, as it ensures that their main components meet the required quality standards to ensure long-term performance.

Where can I find more information about proqc quality control?

Visit to learn more about our quality solutions. One of the main challenges within the photovoltaic industry is quality defects. How to perform a solar panel quality control inspection?

.

How to prepare a solar panel for production?

Before the actual production process begins, it is important to pre-select the cells that will be integrated into the final solar panel, verify the glass control process for mechanical resistance and transparency control, check the

lamination time, and confirm the different stages of control planned through the production process.

What elements are inspected during the final QC inspection process?

Several elements of the complete solar panel are inspected during the final QC inspection process. The end-to-end verification process follows this guideline checklist: 1. Visual Inspection: Verification of the overall aesthetic view of the solar panels, batteries, inverters, solar charge, cables, and accessories.
